

Data Integration

Towards a vision of meaningful integration

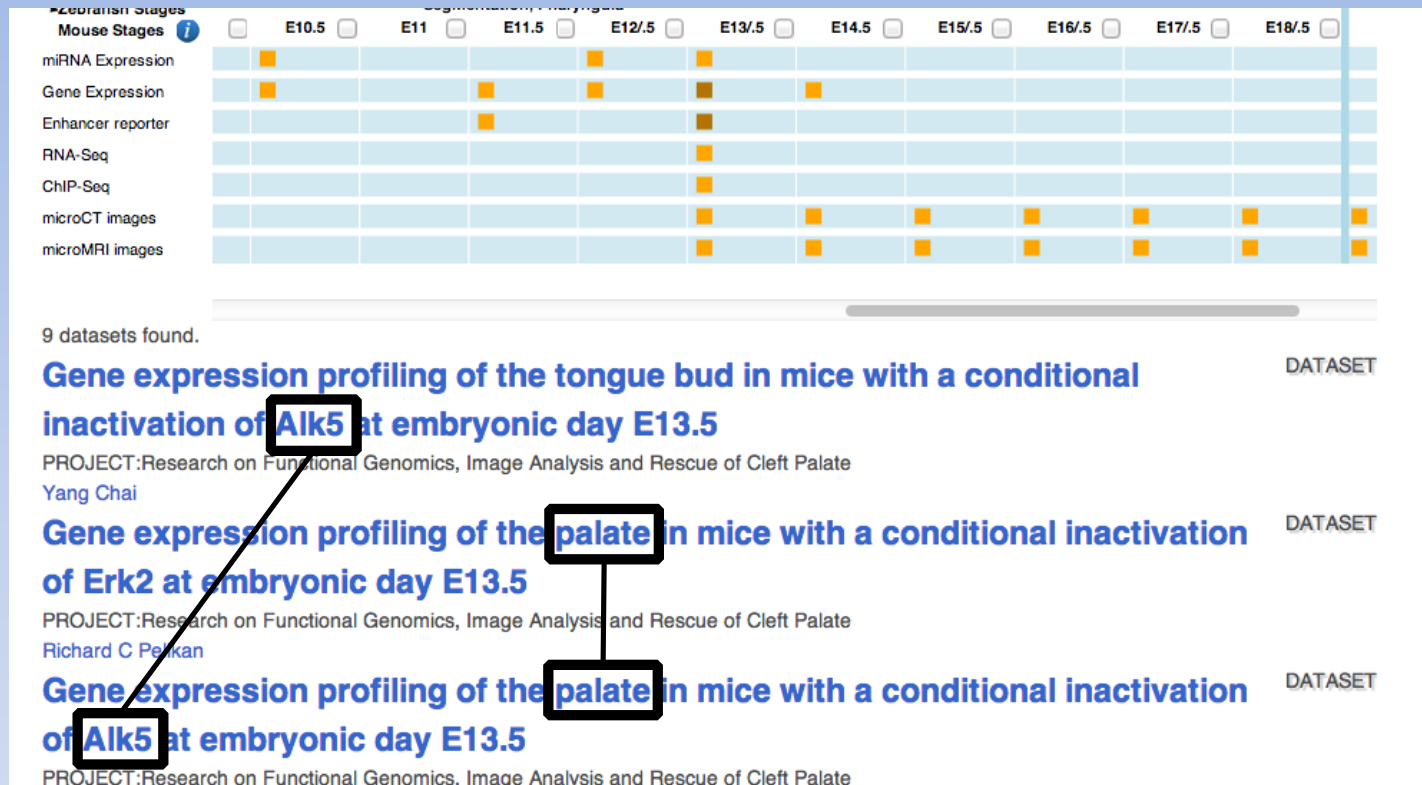

- Visualize the database network.
- Stimulate thoughts about scientific questions.
- “Gap analysis”:
 - Find fruitful questions & hypotheses.
 - What gaps in the database network should be filled, to maximize the # of important questions made answerable?

Comparisons/Integration

- Goal: focus on inter-spoke integration

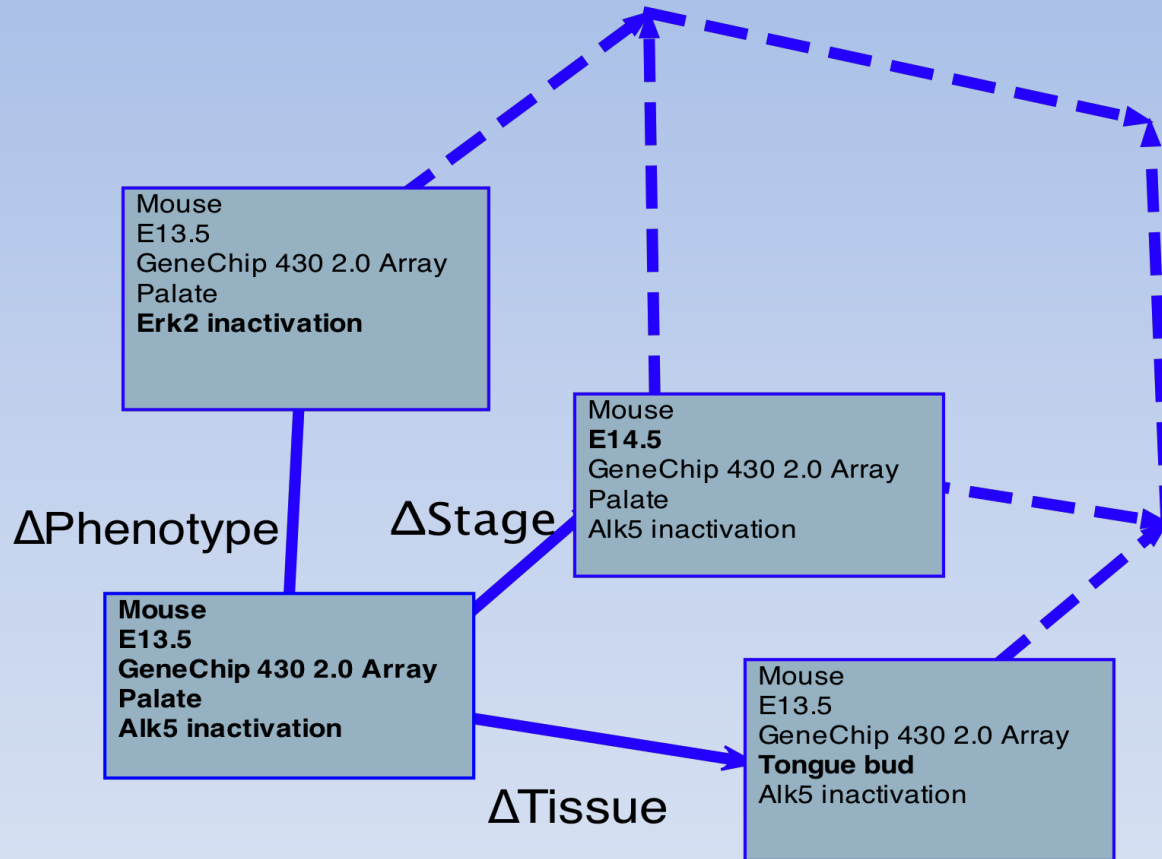

Comparison type	Mapping type	Resource (examples)
Time to time	Anatomic site	Imaging Expression Data
Location to location	Adjacency	Ontology-dependent
Species to species	Anatomic site	Ontology-dependent
	Genetic homology	HomoloGene
	Developmental stage	Carnegie Stage
Platform to platform	Semantic identifier map	DAVID, Enfin, ...

Dataset Timeline

Opportunities to merge data on both stage and anatomic site?

Dataset Network

Inter-spoke opportunities – Mouse

	E9.5	E10.5	E11.5	E12.5	E13.5	E14.5
1						
2						
3	Mandibular Arch		Alk5			
4	Olfactory Placode					
5	Olfactory Pit					
6	Facial Mesenchyme					
7	Otic Vesicle					
8	Rathke Pouch					
9	Maxillary Arch					
10	Medial-nasal Process					
11	medial-nasal eminence					
12	Lateral-nasal process					
13	Lateral-nasal eminence					
14	Medial neuroepithelium					
15	Epithelial					
16	Neuroepithelium					
17	Manidble			Erk2	miRNA	
18	Tongue Bud				Alk5	
19	Tongue				Tgfr2,Erk2	Tgfr2
20	Tongue Primordium				Tgfr, Smad4	
21	Palate				Alk5,Erk2,Tgfr2	Erk2,Tgfr2, Tgfr2 and haploinsufficiency of Alk5
22					p300 ChIP-Seq, RNA-Seq	
23	Medial-Edge Epithelium					Tgfr2
24	Palate and Mandible					Mdx1-/-
25	Maxilla		miRNA	miRNA	miRNA	RNA-Seq
26	Front-nasal prominence		miRNA	miRNA	miRNA	
27	Fronto-nasal process					
28	Palatal Shelves				miRNA	RNA-Seq

PotterMicroarray

Chai Microarray, with gene

Visel, ChIP-Seq, RNA-Seq

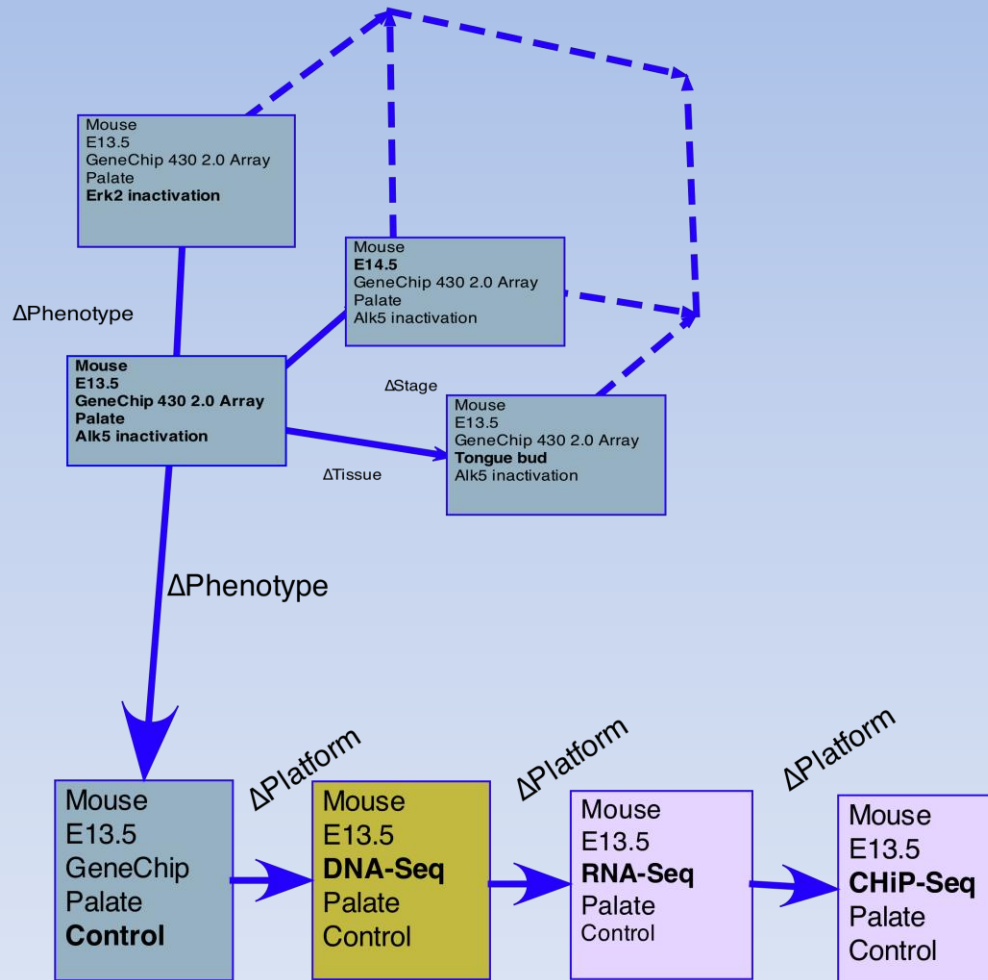

Clouthier miRNA, RNA-Seq

One cross-spoke integration possibility

	E13.5	
	Microarray	Other
Palate	STRAINS: Control, Alk5, Erk2, Tgfbr2,	STRAIN: Control, p300 ChiP-Seq, RNA-Seq

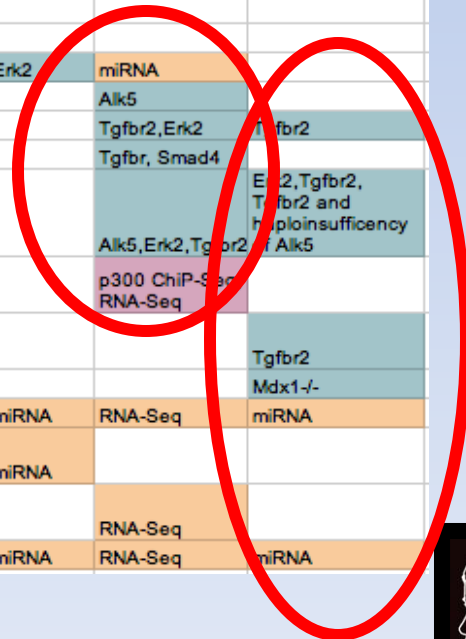

But – different background – C57BL6J vs. CD-1

Possible Integrations

Other inter-spoke opportunities?

	E9.5	E10.5	E11.5	E12.5	E13.5	E14.5
1						
2						
3	Mandibular Arch		Alk5			
4	Olfactory Placode					
5	Olfactory Pit					
6	Facial Mesenchyme					
7	Otic Vesicle					
8	Rathke Pouch					
9	Maxillary Arch					
10	Medial-nasal Process					
11	medial-nasal eminence					
12	Lateral-nasal process					
13	Lateral-nasal eminence					
14	Medial neuroepithelium					
15	Epithelial					
16	Neuroepithelium					
17	Mandible			Erk2	miRNA	
18	Tongue Bud				Alk5	
19	Tongue				Tgfr2, Erk2	Tgfr2
20	Tongue Primordium				Tgfr, Smad4	
21	Palate					Erk2, Tgfr2, Tgfr2 and haploinsufficiency
22					Alk5, Erk2, Tgfr2	Alk5
23	Medial-Edge Epithelium				p300 ChIP-Seq	
24	Palate and Mandible				RNA-Seq	Tgfr2
25	Maxilla	miRNA	miRNA	miRNA	RNA-Seq	Mdx1 ^{-/-}
26	Front-nasal prominence	miRNA	miRNA	miRNA		
27	Fronto-nasal process				RNA-Seq	
28	Palatal Shelves			miRNA	RNA-Seq	miRNA

CoGENE Data – Human Craniofacial Development (M. Lovett)

Tissue/Timepoint	26 days (E10-10.5)	4 weeks (E10.5)	5 weeks (E11.5)	6 weeks (E13)	8.5 weeks (E16)
1st pharyngeal arch		█			
2nd pharyngeal arch		█			
3rd (& 4th) pharyngeal arch		█			
anterior rhombomere		█			
anterior tongue					█
dental lamina					█
frontal nasal prominence		█			
lateral nasal prominence				█	
lower lip					█
mandible				█	█
maxilla				█	
medial nasal prominence				█	
palatal shelf					█
posterior rhombomere		█			
posterior tongue					█
salivary gland					█
upper lip					█
whole embryo	█				

Beyond Expression and SEQ data

- What can we do to integrate image data?
- Currently looking at revising image datasets to include metadata and source data suitable for quantitative analysis
- Can we tie the quantification or localization to expression data?
- Morphometrics?
- Integrating across organisms? Human <-> Mouse <-> Fish

Beyond Datasets

- Goal: revise dataset model to expose details more clearly
- Show individual files, support “shopping cart” download via alternative search approaches
- Use OCDM to make connections

Issues

- Need collaboration between spokes and hub to do this well.
- Is integration static or dynamic?
- What are the scientific questions of interest?
