

2015 FaceBase Annual Meeting

Integrated research of functional genomics and craniofacial morphogenesis

PI: Yang Chai

University of Southern California

Team Members:

Carolina Parada

Alexandre Grimaldi

Thach-Vu Ho, Shery Park

Hu Zhao

Bridget Samuels

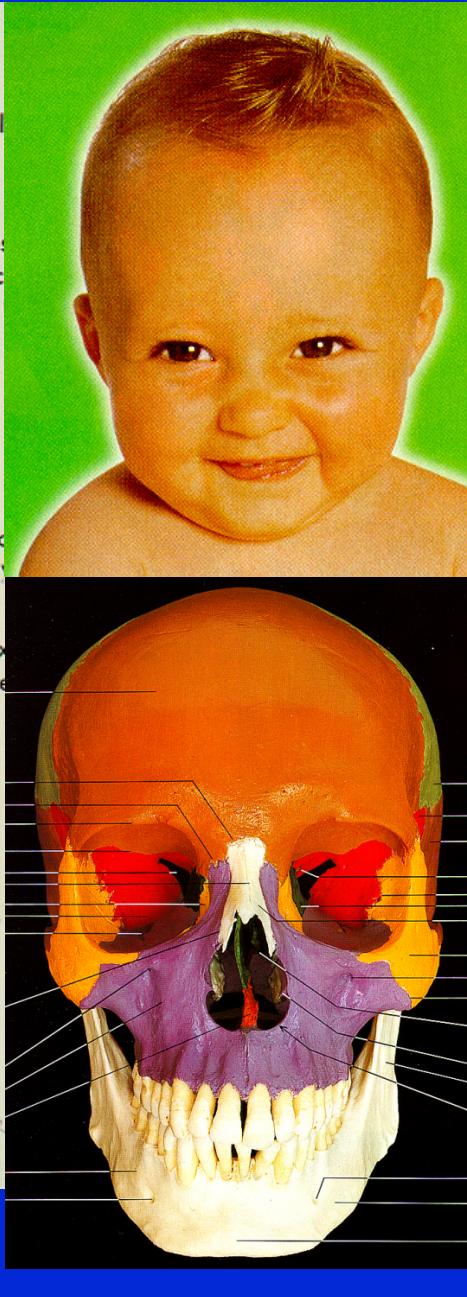

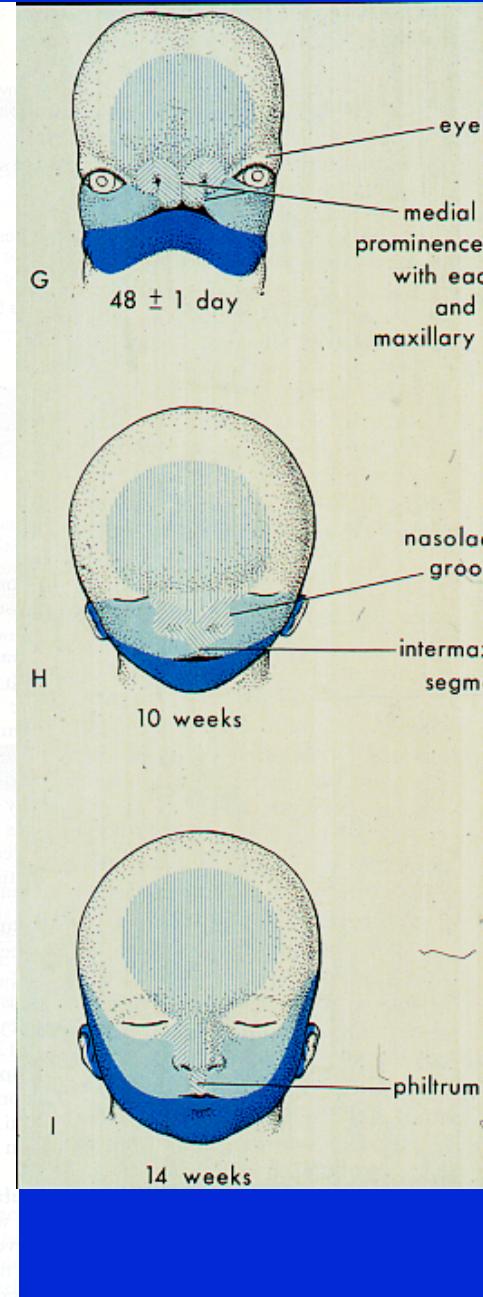

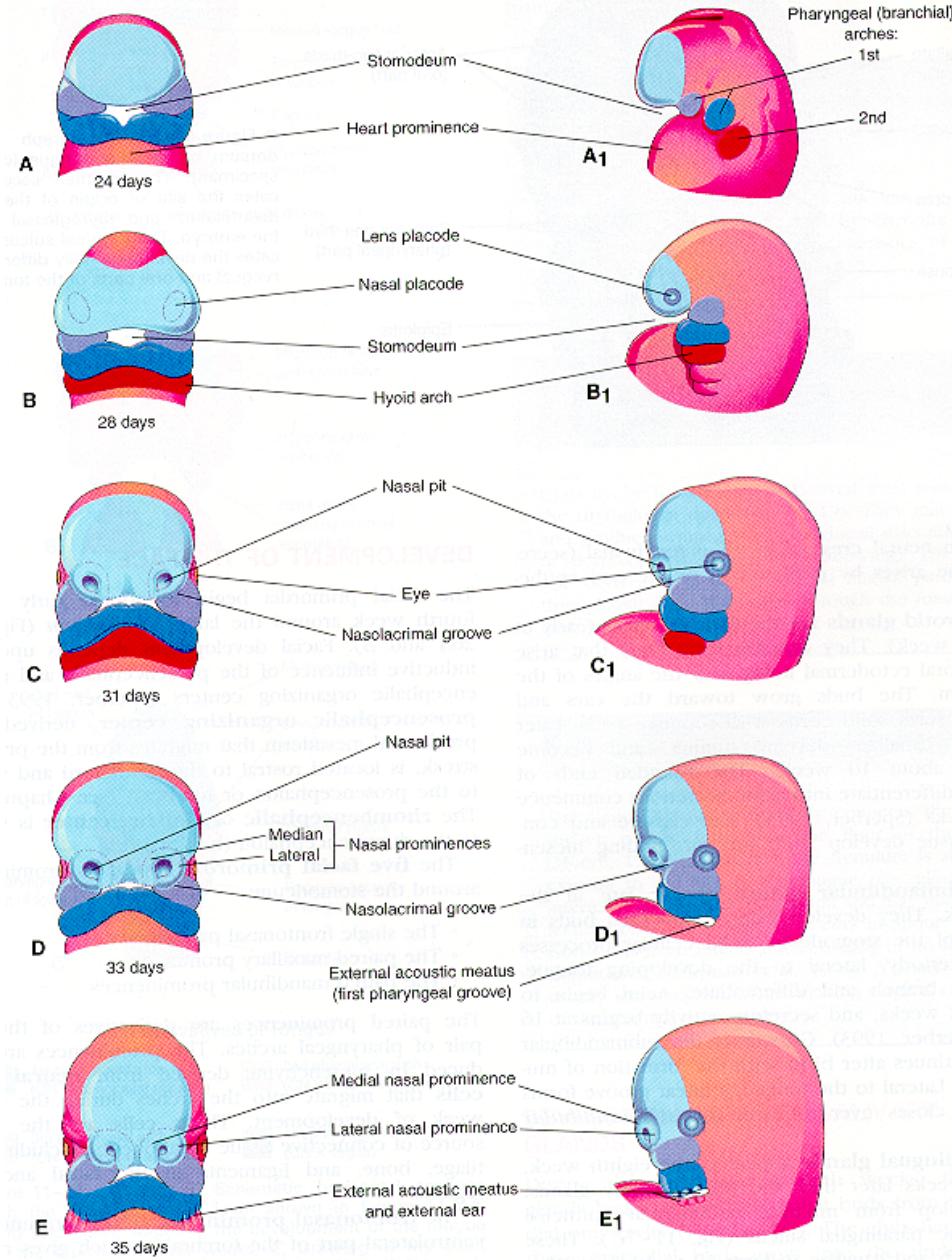

Pedro Sanchez

Paul Thomas (bioinformatics)

Jeremy Green (KCL)

U01 DE024421 NIDCR, NIH

Facial patterning and development – *Our face is our identity*

Specific Aims

1. Global and specific gene expression analyses and 3D imaging study
 - (1) General gene expression profiles during mandible development using microarray/RNA-Seq
 - (2) Specific gene expression, define sub-domains within the developing mandible, and correlate this information with cell fate analysis
 - (3) 3D imaging and ontology development
2. Gene expression, cell fate and 3D imaging during maxilla development

Mandible and Maxilla Developmental Defects

Treacher Collins syndrome

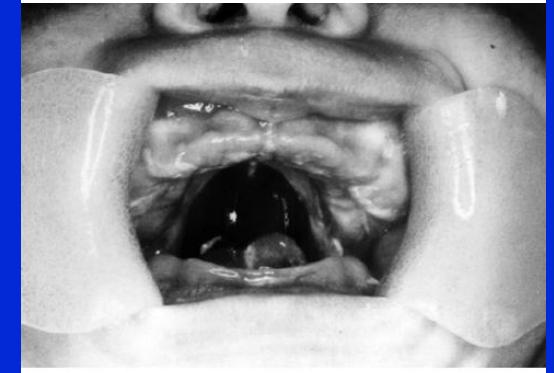

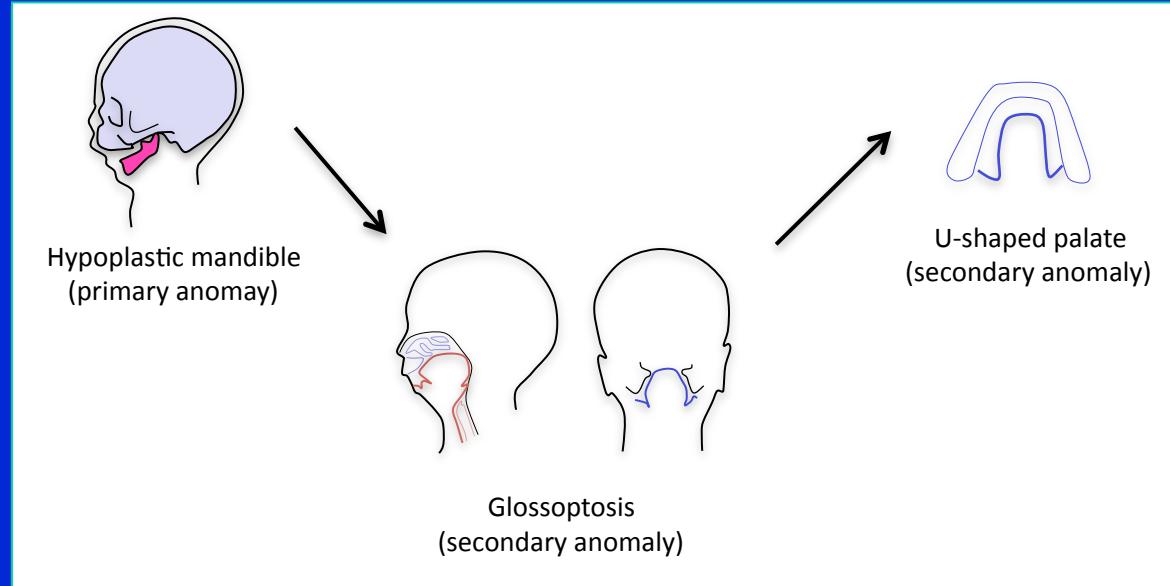

1/50,000

**Craniofacial microsomia
(Goldenhar syndrome,
hemifacial microsomia,
Oculo-Auriculo-Vertebral
syndrome)**

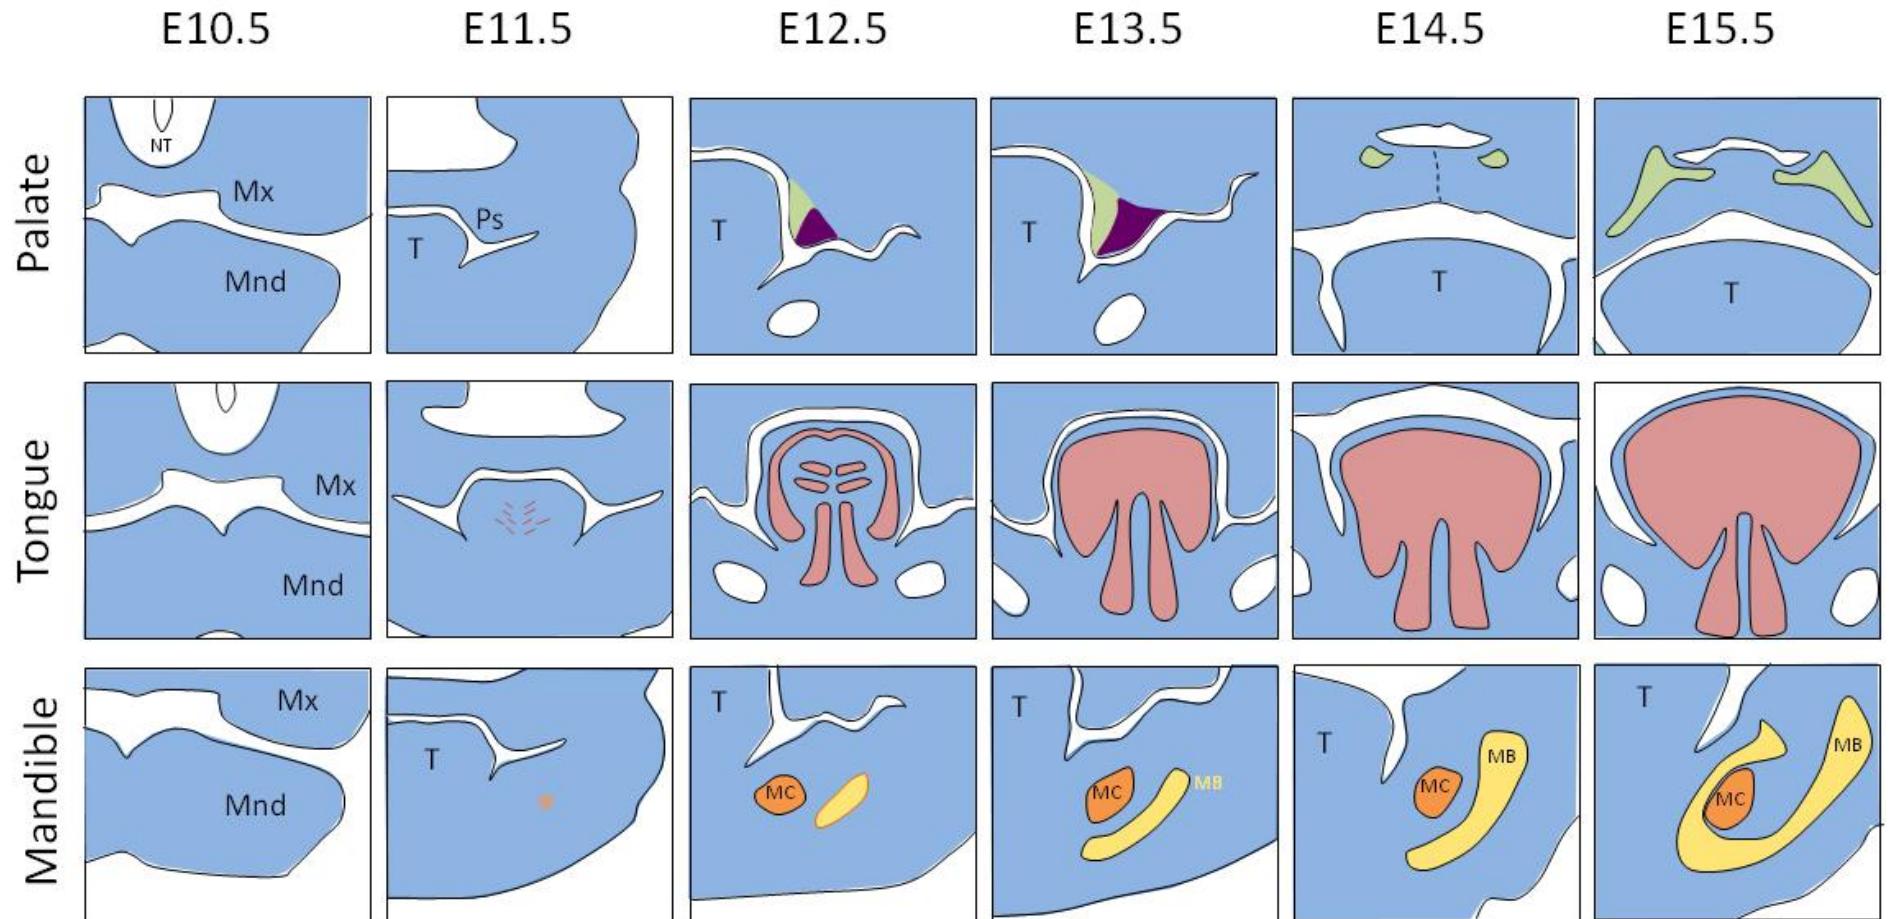

1/3500-25,000

Mandibular defects and craniofacial malformations

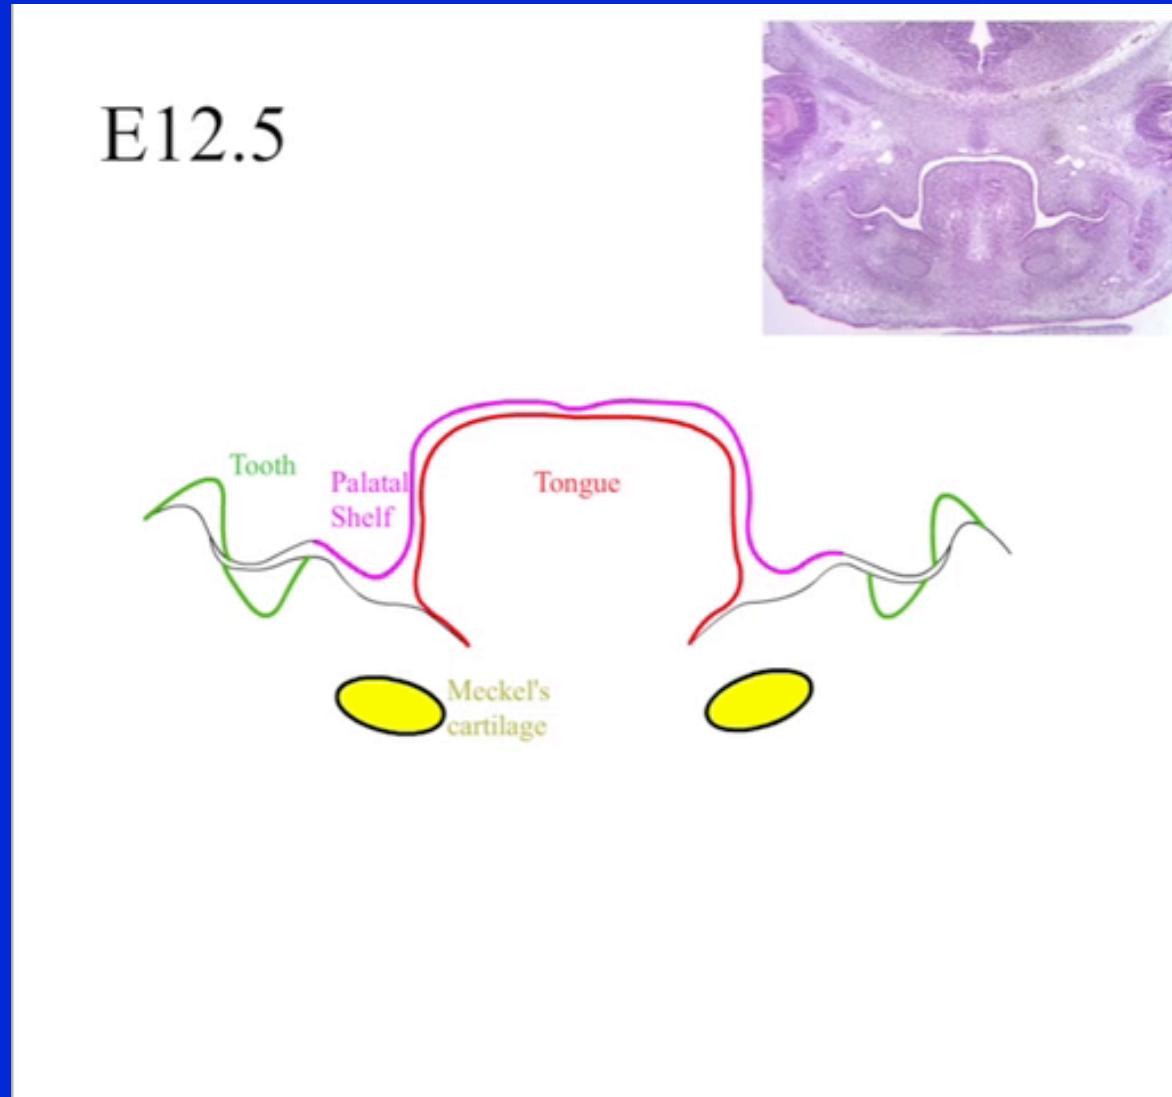

Pierre-Robin sequence

Integrated palate, tongue, and mandible development

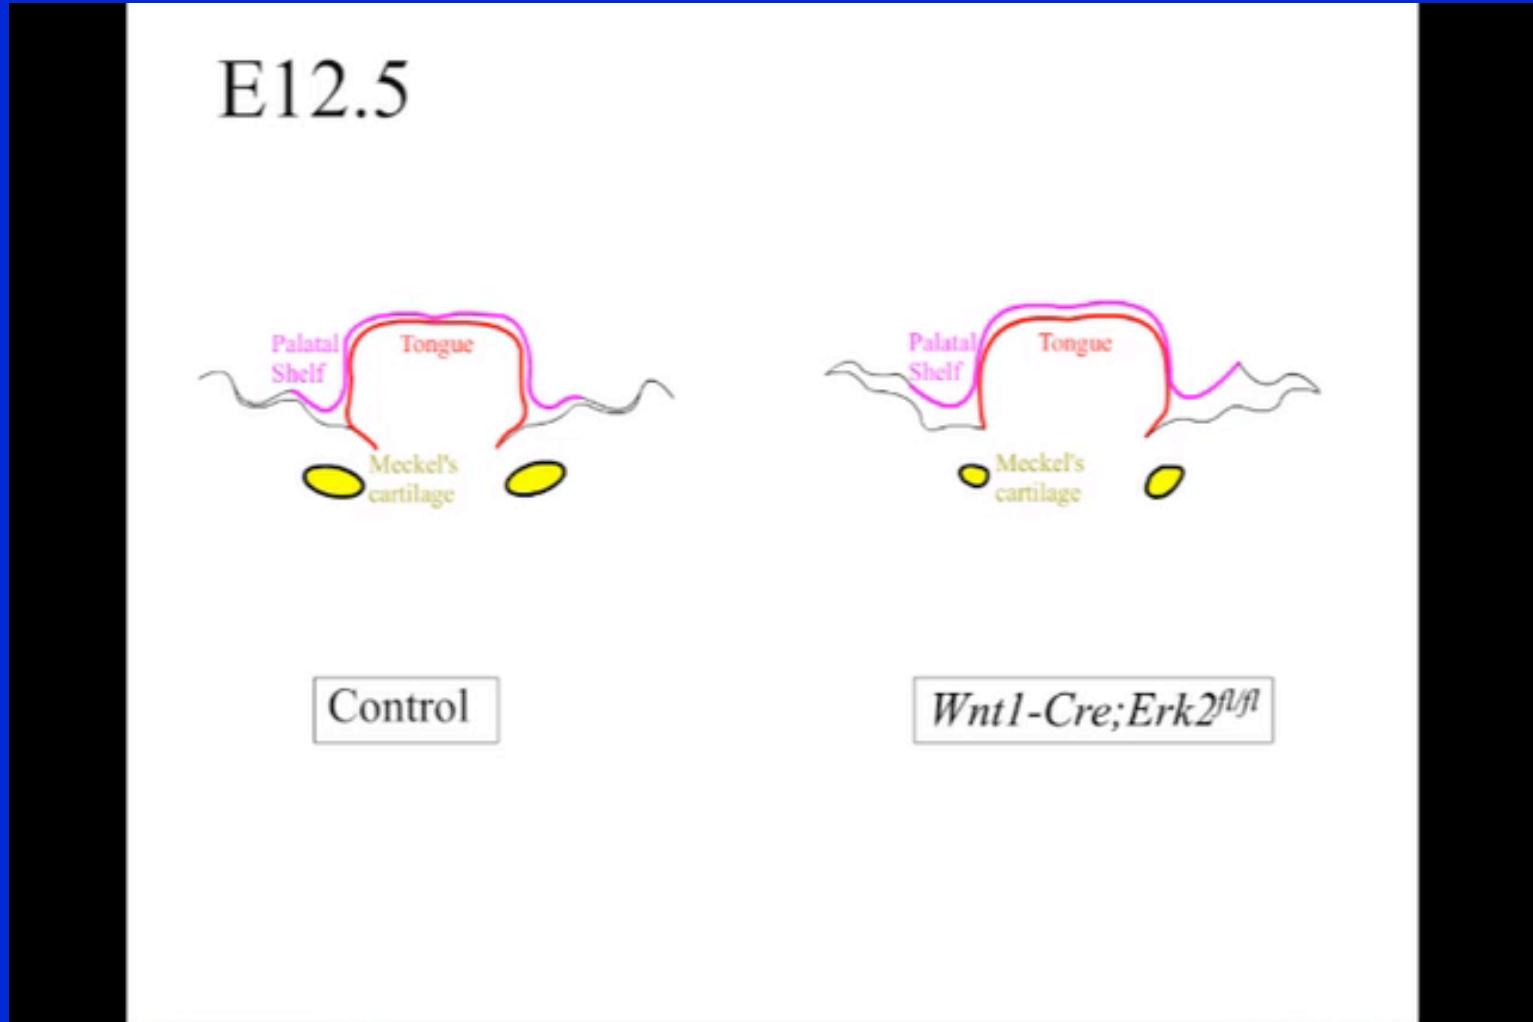

cell fate, gene expression and 3D imaging analyses

Integrated palate, tongue, and mandible development

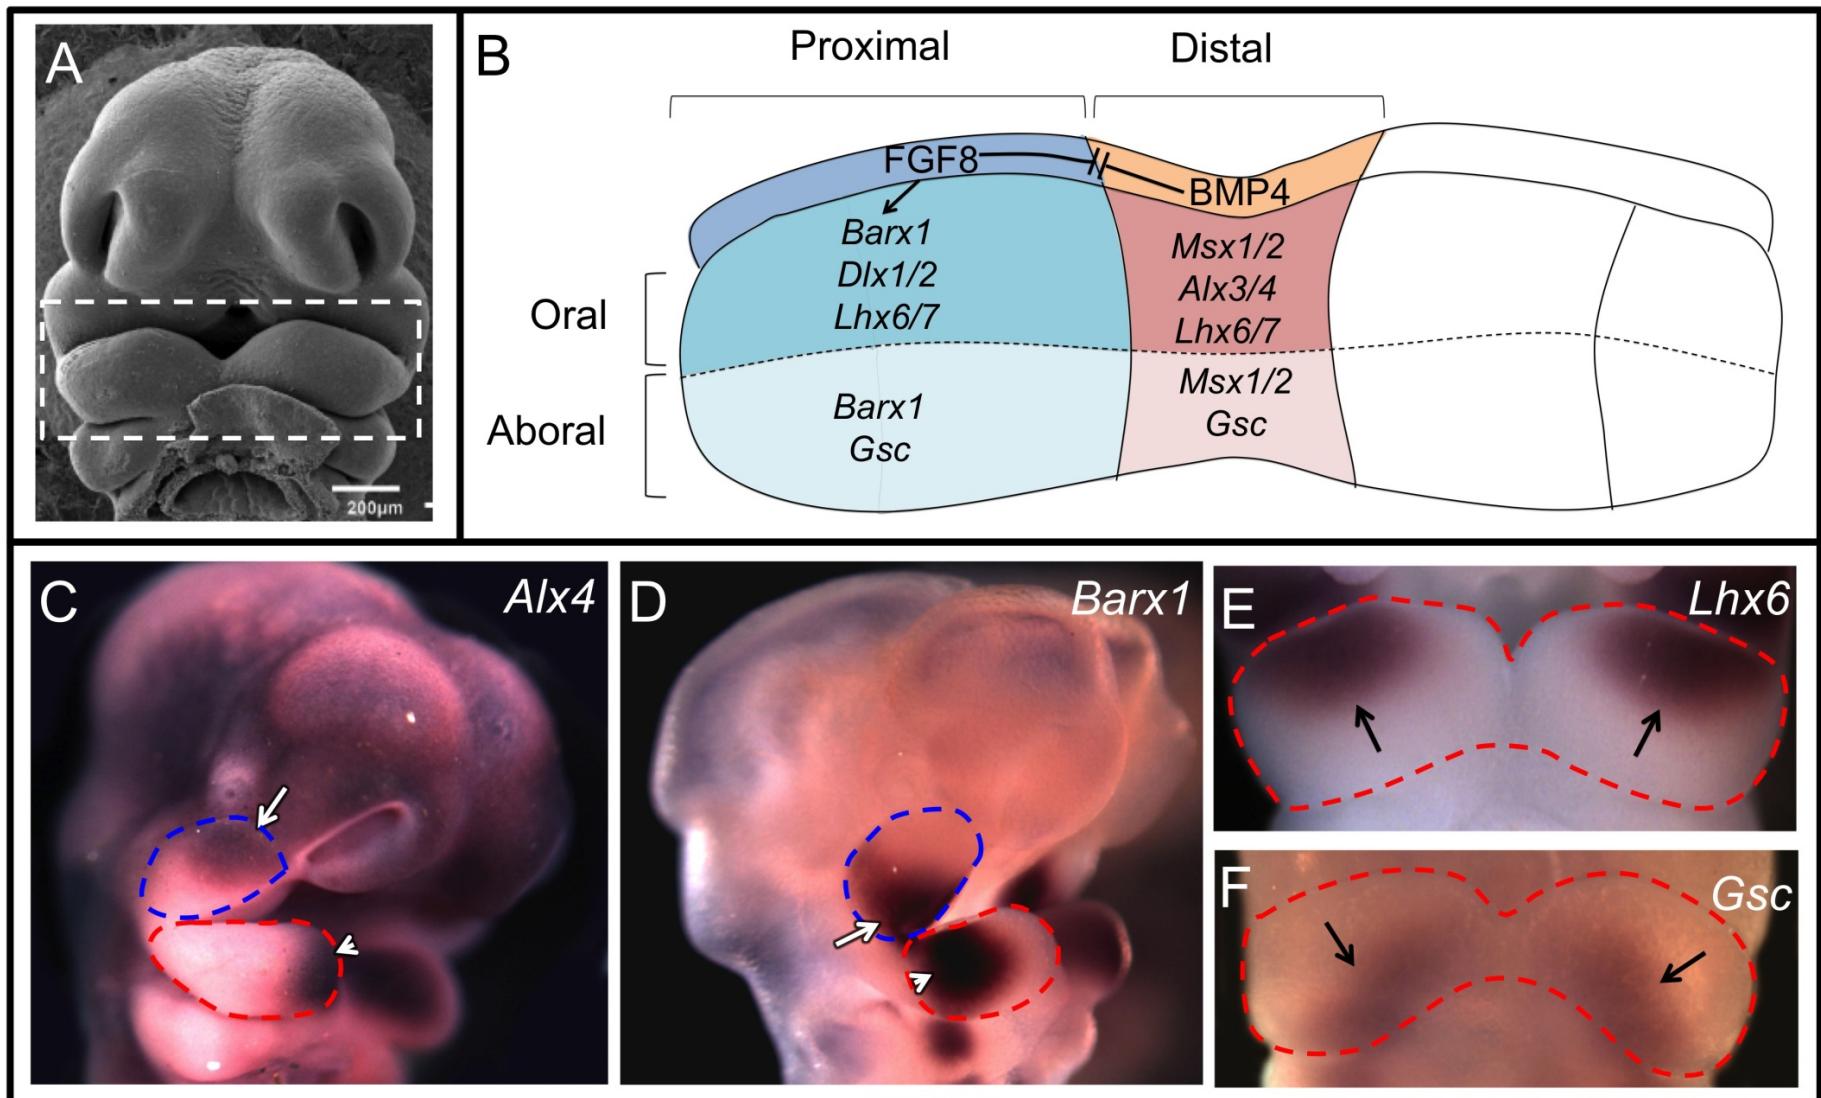

Cleft palate as a secondary defect of mandible malformation

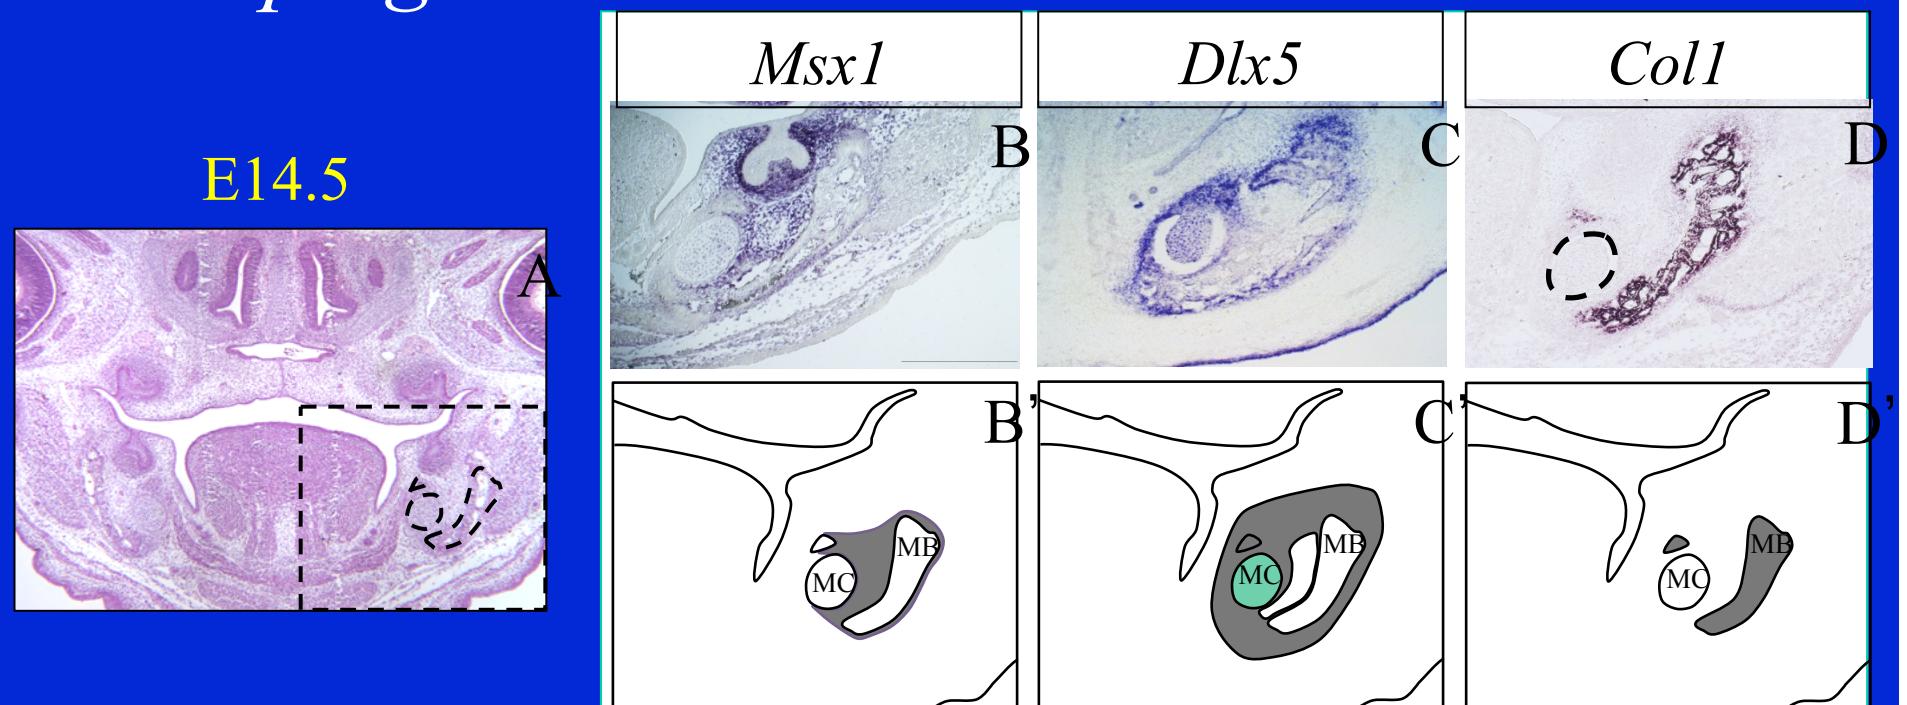

See poster by Carolina Parada

Gene expression and patterning of the branchial arch

Early patterning of the maxillary and mandibular arches

Molecular identity of the proximal region of the developing mandible

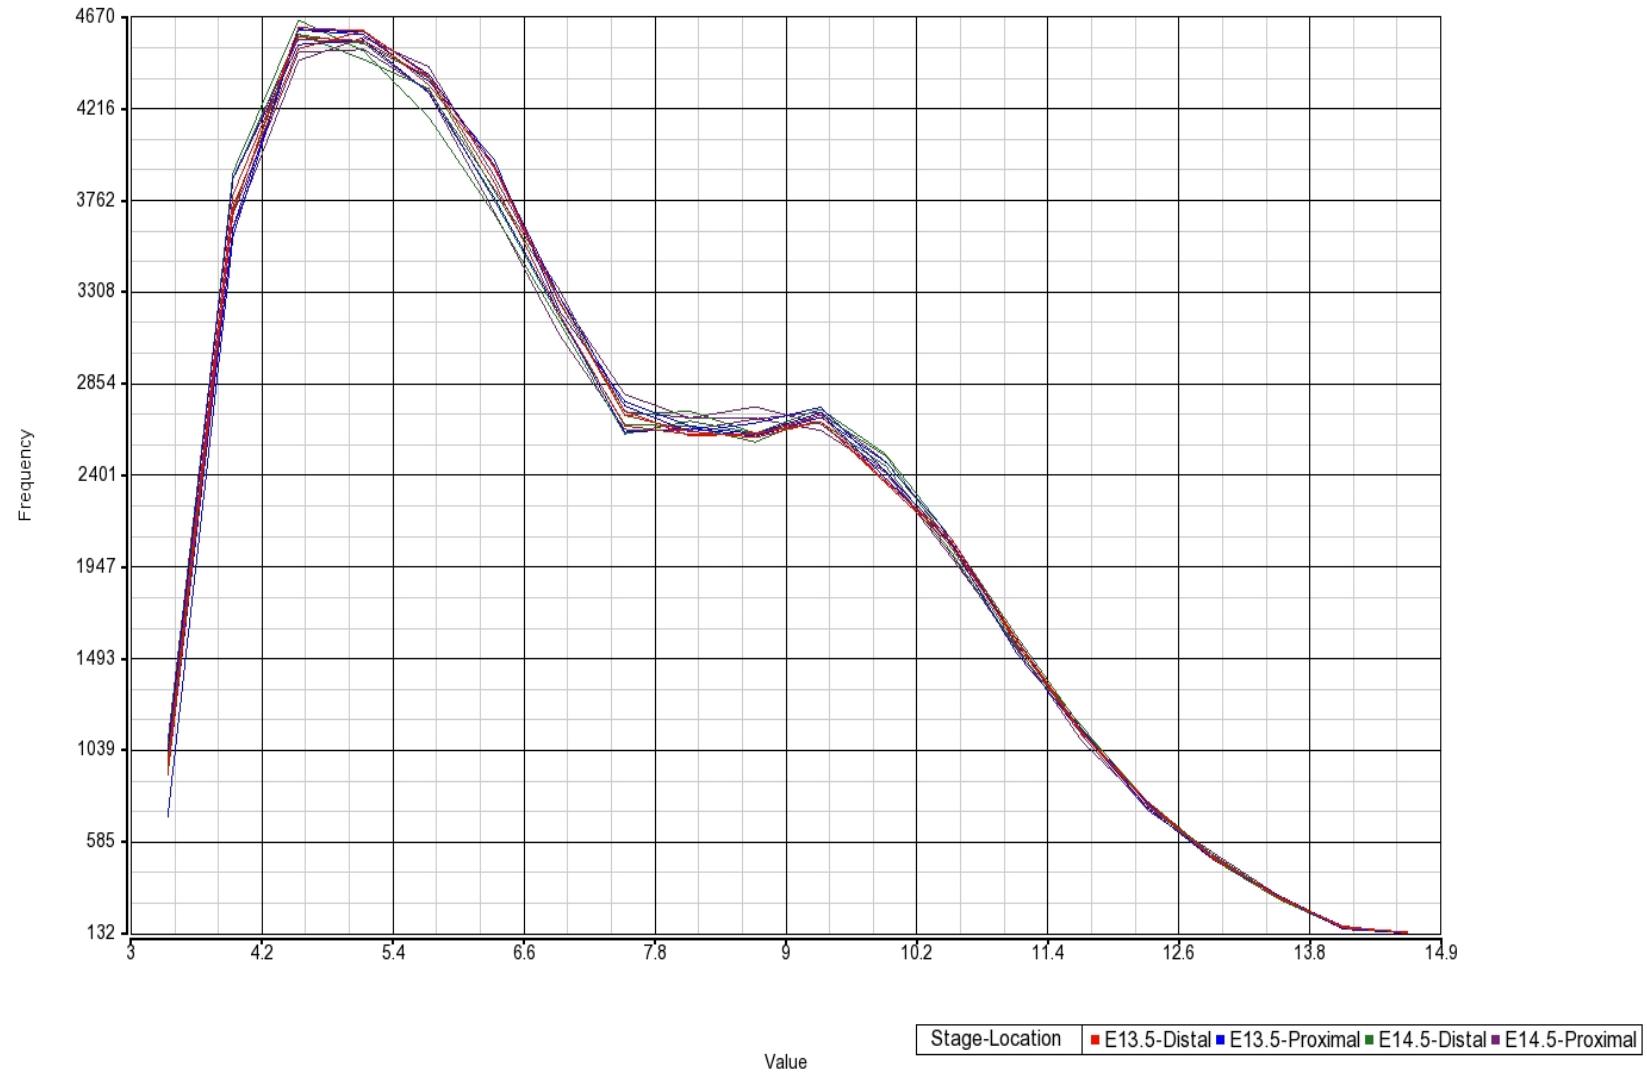

Gene expression profile analyses

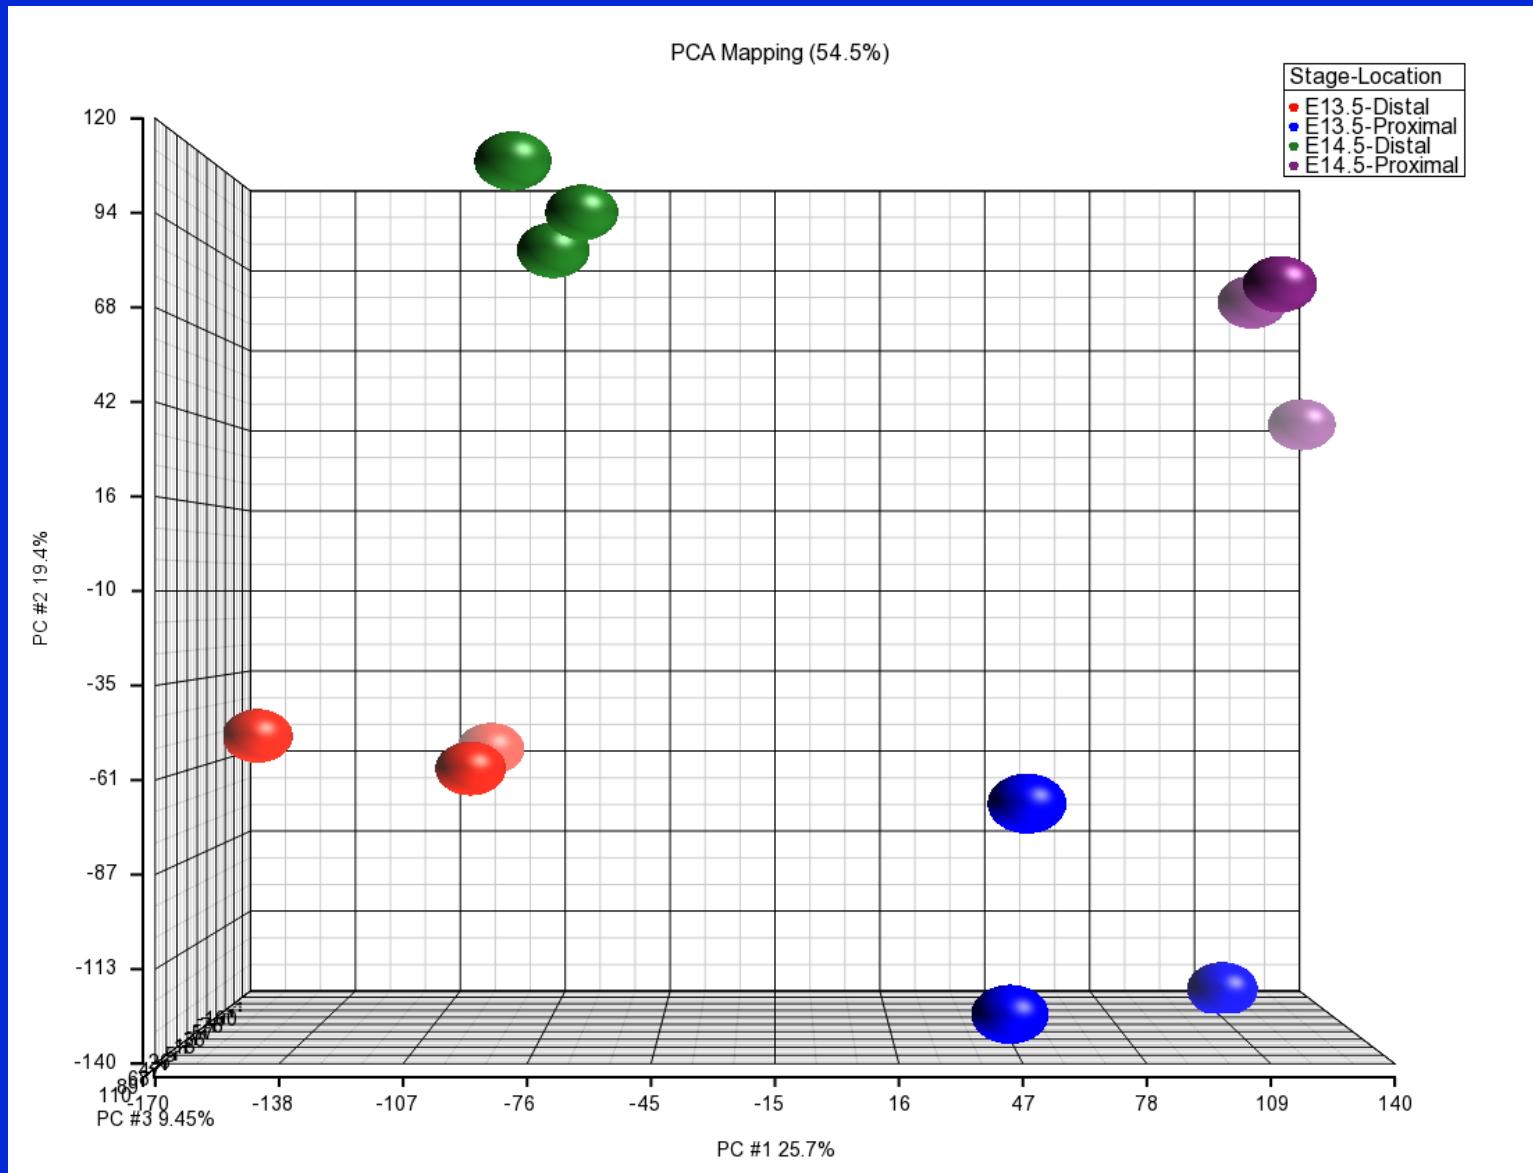

No. Samples	Scan Date	Location	Stage
3	11/20/2014	Distal	E13.5
3	11/20/2014	Distal	E14.5
3	11/20/2014	Proximal	E13.5
3	11/20/2014	Proximal	E14.5

- Downloaded from CHLA on 11/25/2014
- All samples run on Affymetrix GeneChip Mouse Genome 430 2.0
- Data imported into Partek Genomics Suite 6.6
- Preliminary analysis completed on 12/9/2014

All Rows of 1

Consistent distribution of probeset intensities across all samples

Principal Component Analysis shows good separation between sample groups

Analyses

Partek ANOVA and Ingenuity Pathway Analysis (IPA)

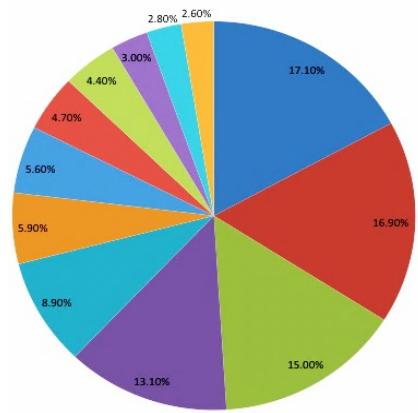

1. Distal vs Proximal in Stage E13.5
 2. Distal vs Proximal in Stage E14.5
 3. Stage 13.5 vs Stage E14.5 in Distal
 4. Stage 13.5 vs Stage E14.5 in Proximal
-
- Genes from each ANOVA with fold change >1.5 or <-1.5 & FDR-adjusted $p<0.05$ were carried forward to each respective IPA
 - All other default settings used

Gene expression profile along the Distal-Proximal axis in the developing mandible

Pitx2

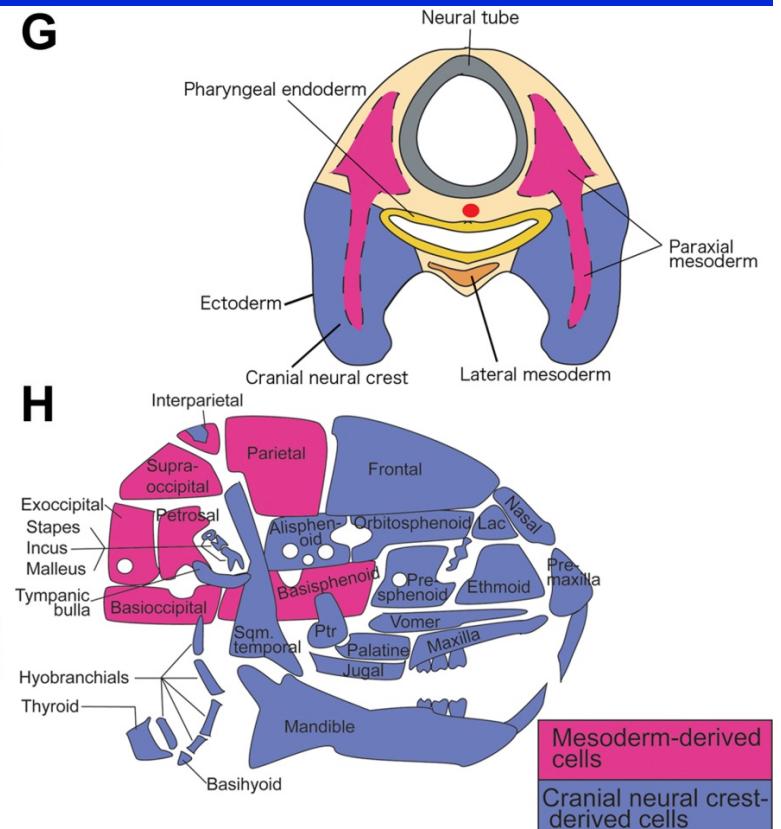

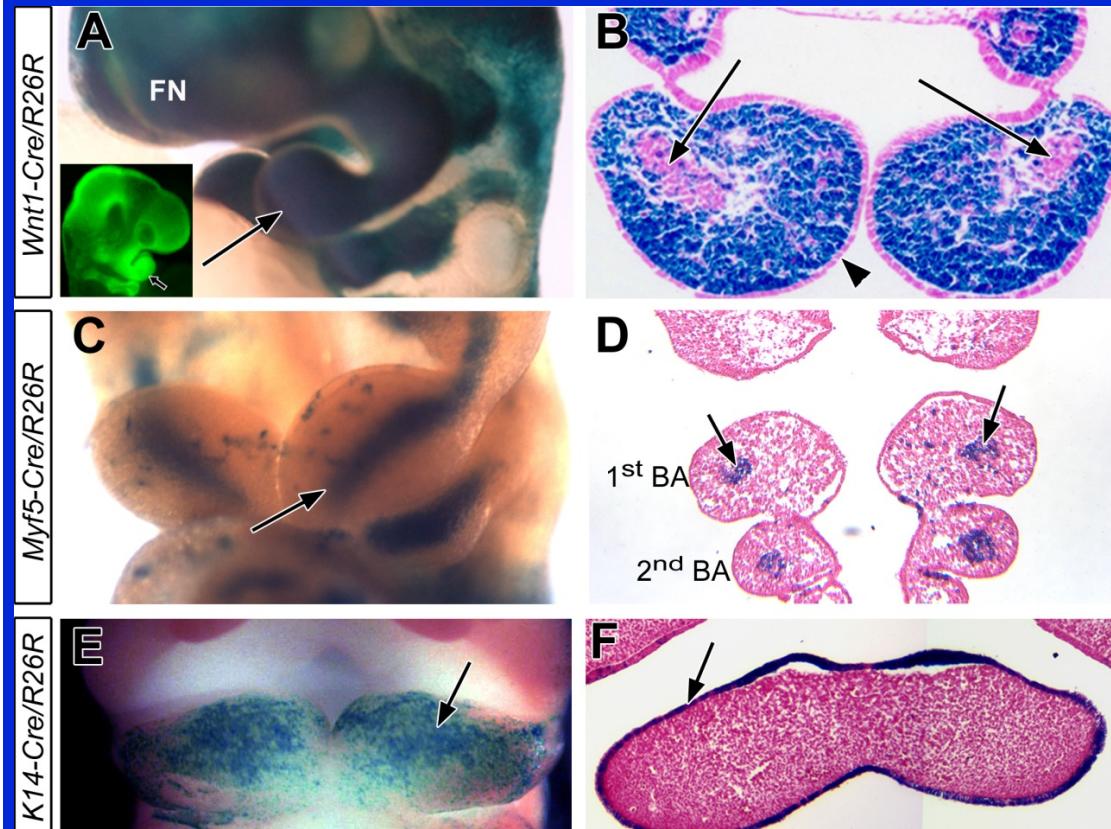

Gene Detail

Your Input Welcome

Symbol	Pitx2
Name	paired-like homeodomain transcription factor 2
ID	MGI:109340
Synonyms	Brx1, Brx1a, Brx1b, Munc30, Otx2, Pitx2a, Pitx2b, Pitx2c, Ptx2, Rieg, solurshin
Feature Type	protein coding gene
Genetic Map	Chromosome 3 57.84 cM Detailed Genetic Map ± 1 cM Mapping data(5)
Sequence Map	Chr3:129199878-129219591 bp, + strand From VEGA annotation of GRCm38 Get FASTA 19714 bp ± 0 kb flank VEGA Genome Browser Ensembl Genome Browser UCSC Browser NCBI Map Viewer
Vertebrate homology	HomoloGene:55454 Vertebrate Homology Class 1 human; 1 mouse; 1 rat; 1 chimpanzee; 1 rhesus macaque; 1 cattle; 1 dog; 1 chicken; 1 western clawed frog; 1 zebrafish Protein SuperFamily: homeobox protein, Pitx/Unc30 types Gene Tree: Pitx2
Human homologs	Human Homolog PITX2, paired-like homeodomain 2 NCBI Gene ID 5308 nexProt AC NX_Q99697 Human Synonyms ARPI, Brx1, IDG2, IGDS, IGDS2, IHG2, IRID2, Otx2, PTX2, RGS, RIEG, RIEG1, RS Human Chr (Location) 4q25; chr4:110617423-110642123 (-) GRCh38 Disease Associations (4) Diseases Associated with Human PITX2
Mutations, alleles, and phenotypes	All mutations/alleles(18) : Targeted(18) Incidental mutations (data from Mutagenetix , APF) Homozygotes for targeted mutations show failed ventral body wall closure, right pulmonary isomerism, septal and valve defects, absent ocular muscles, arrested pituitary and tooth development, optic nerve, mandible and maxilla defects, and embryonic death. Human Diseases Modeled Using Mouse Pitx2 Alleles Annotated to Human Diseases(6)

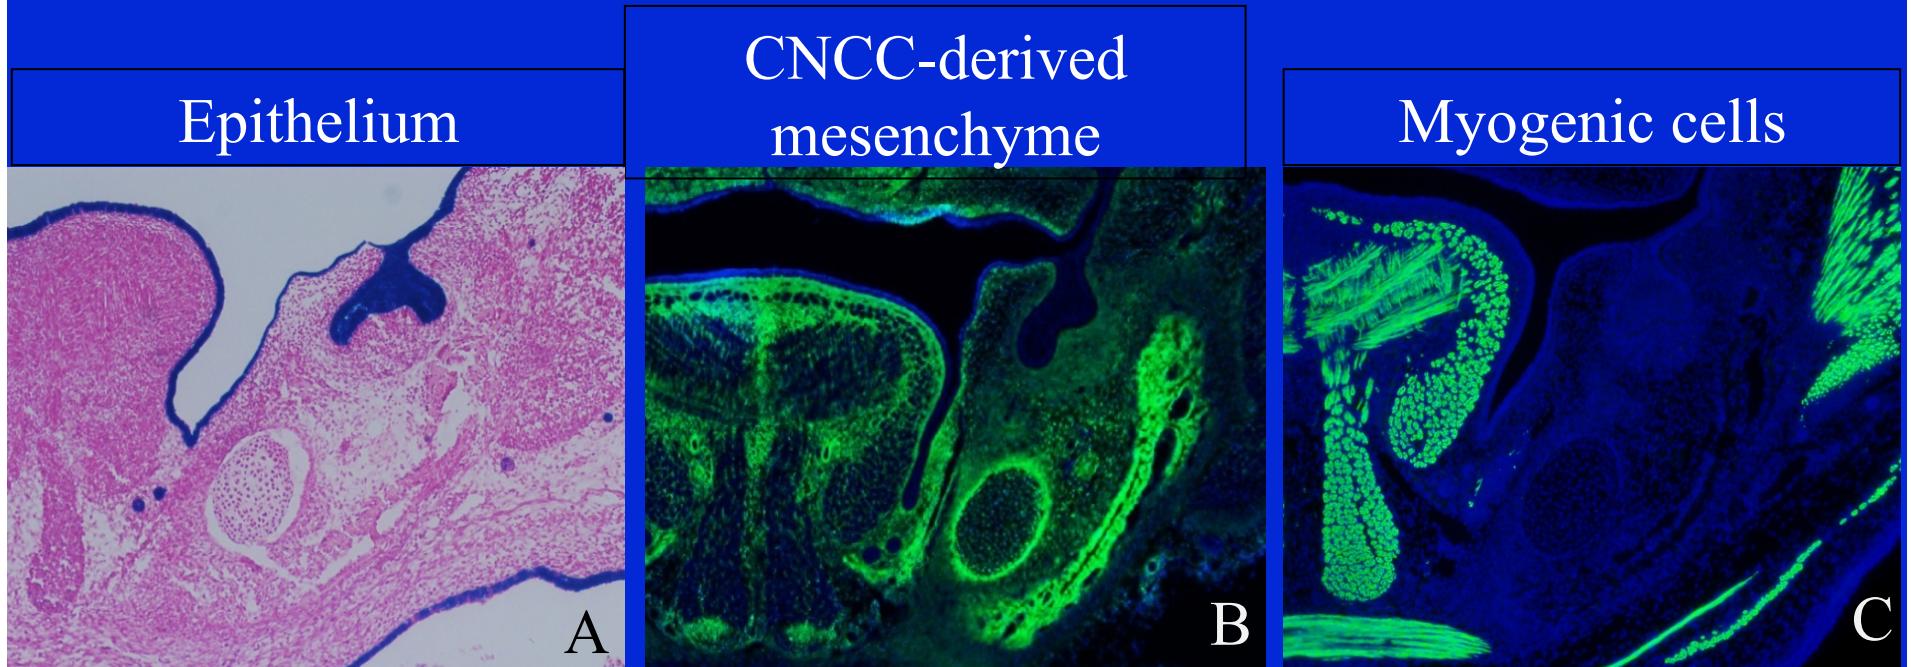

Genetic cell lineage analyses

E10.5

Cell lineage analysis during mandible development

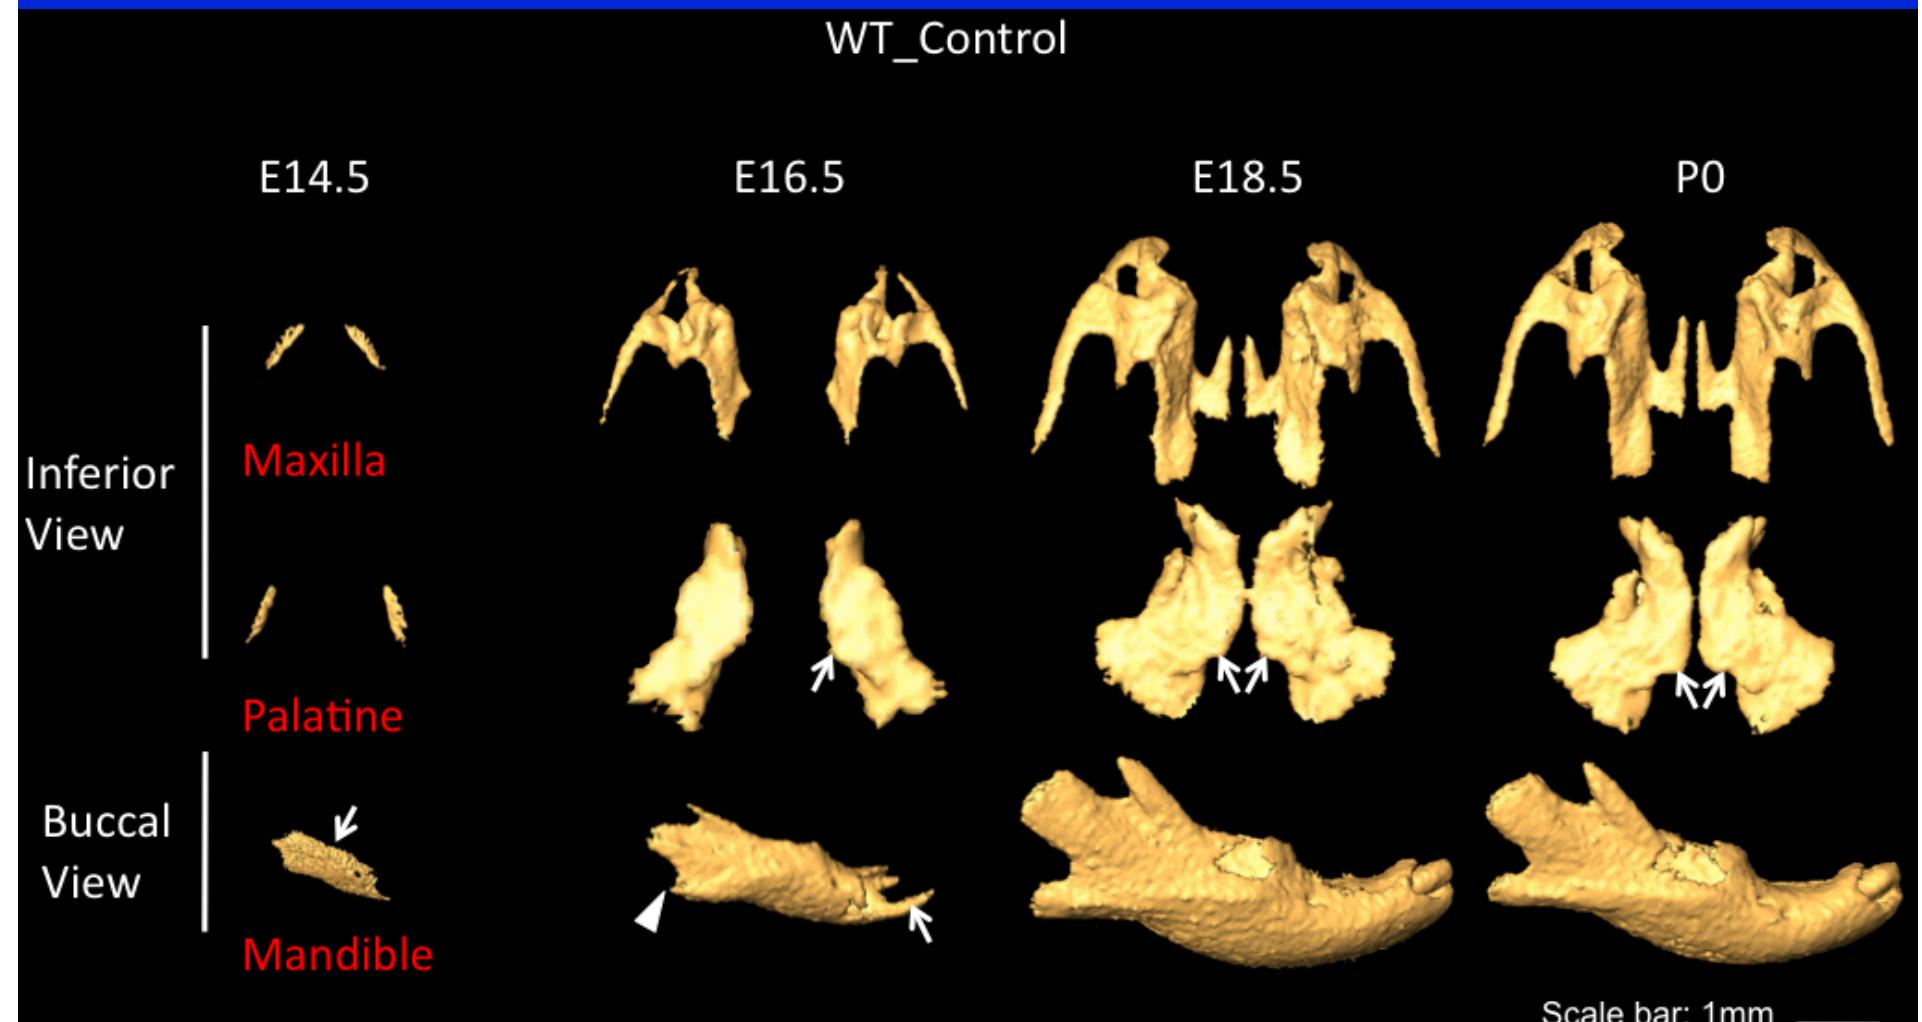

K14-Cre;R26R

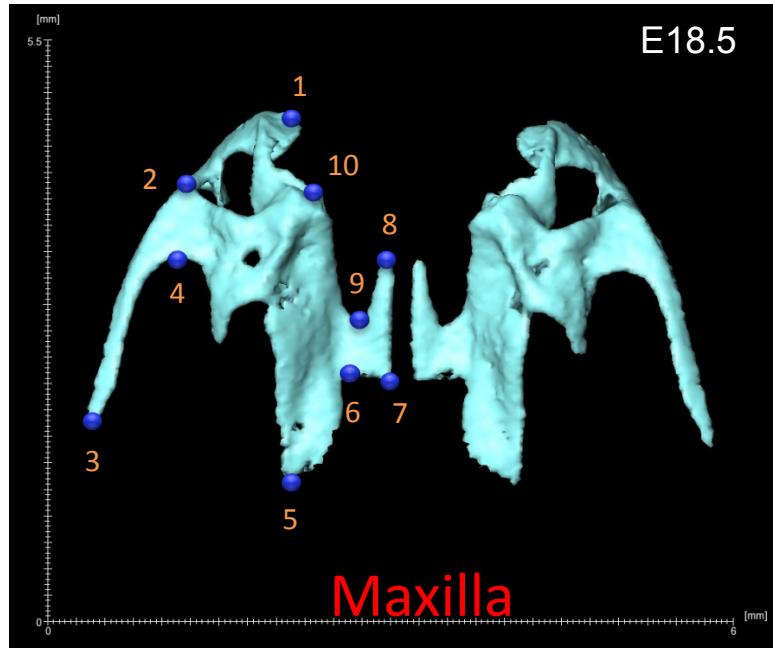

Wnt1-Cre;ZsGreen

Myf5-Cre;ZsGreen

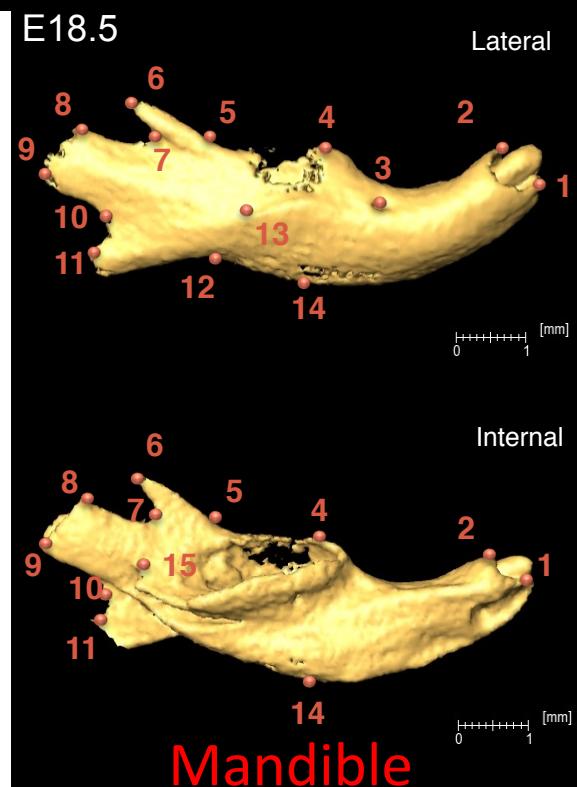

E14.5

Morphogenesis of craniofacial bones

1. Anterior point of maxilla
2. Lateral inferior intersection of frontal and zygomatic process
3. Junction point of zygoma with zygomatic process
4. Antero-medial point to zygomatic process
5. Posterior point of maxilla
6. Posterior-lateral point of the palatine process
7. Posterior-medial point of the palatine process
8. Most Anterior-medial point of palatine process
9. Anterior-lateral point of palatine process
10. Medial point of premaxillary-maxillary suture

1. Most anterior point of mandible
2. Anterior-superior point of mandible
3. Mental foramen
4. Molar alveolus of dentary
5. Anterior junction of mandibular ramus and body
6. Superior tip of coronary process
7. Most inferior point of mandibular notch
8. Anterior point of condylar process
9. Posterior point of condylar process
10. Superior point of angular process
11. Secondary cartilage of angular process
12. Inferior junction of mandibular ramus and body
13. Midpoint of external oblique ridge
14. Inferior point of mandibular body
- 15. Mandibular foramen**
